

OSMOSIS FACT SHEET

ABOUT OSMOSIS

Millions of clinicians are empowered with the best learning experience possible when they use Osmosis.

Developed with years of learning and neuroscience research behind its teaching methods, learners have access to:

- A best-in-class, expanding library of more than 1,800 videos covering physiology, pathology, pharmacology, clinical practice, and more
- Over 8,000 clinical case questions to help you self-assess
- Over 16,000 flashcards, automatically timed out to optimize learner retention
- Over 1,000 corresponding High-Yield Notes so learners are sure they're studying the most useful material

DETAILS

To help you stay on track with your classes, the Osmosis automated Study Schedule helps you get organized for classes and board exams.

- Simply answer a few short questions about your time line and goals. In the time it takes to make a cup of coffee, a personalized, optimized study plan is ready for you
- Includes comprehensive coverage of Pathology and Physiology to help you develop a thorough and long-lasting understanding of preclinical concepts in health
- Rapidly growing coverage of Clinical practice to help learners become confident clinicians
- Review with flashcards powered by spaced repetition to help you with long term retention
- Apply knowledge and boost confidence with board-style practice questions geared towards USMLE® Step 1, USMLE® Step2, COMLEX-USA® OMM, as well as practice questions for Nursing students

With a multi-channel approach to serve all kinds of learners, we reach students on:

- YouTube: Closing in on 2 million subscribers
- Osmosis web platform: 1 million registered users
- Osmosis mobile app: Over 227k total downloads across the App and Play stores

With more than 140 institutional partners, Osmosis is developing customized, cutting-edge programs. These new technologies help train millions of future health professionals so we can avoid current and exacerbating provider shortages.

Completely risk-free, users can trial Osmosis for one week free and become an Osmosis Prime member with one-year access to the full library for \$299.

Osmosis is realizing its mission to empower the world's clinicians and caregivers with the best learning experience possible.

- Topical educational videos called Knowledge Shots to educate the public
- Clinician's Corner to address the soft skills clinicians need to provide better care
- Developing customized new learning technologies with institutional partners

OSMOSIS STATS

- Founded in December 2015
- 1.3 million registered users
- 4.1K registered faculty
- 2.3K schools using Osmosis
- 233 countries
- 1.9 million YouTube subscribers
- Average of 5 million views per month

FOUNDING STORY

Ryan Haynes and Shiv Gaglani started building Osmosis as medical students at Johns Hopkins. Outside of the classroom, they knew there had to be a better way to learn medicine more effectively. What began as a tool to help Shiv, Ryan, and their classmates has transformed into the Osmosis of today, a comprehensive platform that helps people around the world understand health more thoroughly.
